

MAG 2055 RTP Goals and Objective and Performance Measures

MAG RTP Goal	Objectives	Performance Measures
Improving access to opportunities	Building and preserving the grid network	Connectivity Index (links/ intersections)
	Improving access to opportunities within the County	Auto and transit access to employment opportunities ratio
	Access to a Quality Multimodal Network	Percent of people within a quarter mile of a transit station/ AT

MAG RTP Goal	Objectives	Performance Measures
Manageable and reliable traffic conditions	Provide roadway redundancy and eliminate choke points within major travel corridors	Change in VC at defined choke points
	Maintain reliable congestion levels	Systemwide change in VC ratios
	Reduce travel delay	Systemwide hours of total delay

MAG RTP Goal	Objectives	Performance Measures
Quality transportation choices	Availability of existing and planned infrastructure to support development	New lane miles
	Increase transit availability/ use	Mode split (revenue hours)
	Increase active transportation availability	Increase in connected trails

MAG RTP Goal	Objectives	Performance Measures
Safe, user-friendly transportation facilities	Integrate safety policies from the MAG SS4A plan into the RTP	Incorporating safety design features into construction of new roadway capacity
	Address Vulnerable Users (VRU) needs in infrastructure investment	Investment in safe AT infrastructure design

MAG RTP Goal	Objectives	Performance Measures
Clean Air	Improve air quality	VMT over time
