SUBJECT: Request for Conformity Determination for the Mountainland MPO TransPlan50
Amendment

Dear Ms. Mecham :

The Federal Highway Administration (FHWA) received the amendment to the Mountainland Association of Governments (MAG) 2050 long-range regional transportation plan (the "TransPlan50 Amendment") on June 6, 2024. In addition, FHWA, received an email response from Gregory Lohrke from the Environmental Protection Agency (EPA) Region 8 office on June 25, 2024, concurring that the findings of this amendment conforms to the applicable implementation plans for the relevant ambient air quality standards (NAAQS) or shows interim conformity in cases where no approved implementation or maintenance plan exists.

Based my review of the information provided by MAG and the EPA, FHWA is making the determination that this amendment to the 2050 long-range regional transportation plan meets the air quality conformity requirements and conforms with the State Implementation Plan in accordance with 40 CFR 93. If there are any questions, please contact me at 801-955-3515 or rex.harris@dot.gov.

Sincerely,

Rex N. Harris, P.S.E.
Program Development Team Leader
